EDUCATION

MGM University

2022 – 2025

Bachelor of Science in Computer Science

PROJECTS

Daily To-Do List | React, Node.js, Express, MongoDB, Mongoose, JWT

- Built a full-stack task management system with secure JWT-based authentication.
- Implemented complete CRUD operations with date-based task grouping per user.
- Designed scalable MongoDB schemas using Mongoose for efficient querying.

WorldRev | React, Redux, Node.js, Express, MongoDB, Leaflet

- Developed a map-based travel review platform with interactive Leaflet maps.
- Implemented REST APIs to store reviews, ratings, and visited locations.
- Managed global application state using Redux for filters and interactions.

JWT Authentication API (Featured) | Node.js, Express, MongoDB, Mongoose

- Built a reusable authentication system with protected routes and middleware.
- Implemented secure login, signup, and token-based authorization flows.
- Designed as a production-ready boilerplate for MERN applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Redux, Mongoose, Framer Motion

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Postman, Vite, Vercel, Render, Supabase

Currently Learning: GraphQL, Docker, AWS, Redis
